

It has come to my attention that the federal government is trying to start its on telephone privacy bill. I am very happy with the Indiana State bill we have now. Since getting on the no-call list, I have went from as many as 25 calls a week to a mere 1 or 2 calls a week. Can the Federal Government improve that any? I think not! If we must go to a federal run program, I ask that it least be as good as our own Indiana one.
